Situation #1
The mood at Baileysville High School is tense with anticipation. For the first time in many, many years, the varsity basketball team has made it to the state semifinals. The community is excited too, and everyone is making plans to attend the big event next Saturday night. Jeff, the varsity coach, has been waiting for years to field such a team. Speed, teamwork, balance: they've got it all. Only one more week to practice, he tells his team, and not a rule can be broken. Everyone must be at practice each night at the regularly scheduled time: No Exceptions.
Brad and Mike are two of the team's starters. From their perspective, they're indispensable to the team, the guys who will bring victory to Baileyville. They decide to show up an hour late to the next day's practice. They have deliberately disobeyed his orders. The rule says they should be suspended for one full week. If he follows the rule, Brad and Mike will not play in the semifinals. But the whole team is depending on them.
What should he do?

Situation #2
You have an opportunity for an internship at a respected business in the community. Part of your qualifications comes from a senior project that you worked on with several other students. Through the interview process, you discover that you are given credit for a key section of the project that really impressed the company. In fact, another member of your senior team, with little input from you, did that section. What would you tell the interviewer about your involvement in the project?

Situation #3
You are an inmate in a concentration camp. A sadistic guard is about to hang your son who tried to escape and wants you to pull the chair from underneath him. He says that if you don't he will not only kill your son but some other innocent inmate as well. You don't have any doubt that he means what he says. What should you do?

Situation #4
A train is running out of control down a track. In its path are five people who have been tied to the track by a madman. Fortunately, you could flip a switch, which will lead the train down a different track to safety. Unfortunately, there is a baby tied to that track. Should you flip the switch or do nothing?
